

Project Initialization and Planning Phase

Date	04 july 2026
Team ID	xxxxxxx
Project Name	EV Data Analytics & Visualization Dashboard
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A city energy planner	Understand EV charging patterns across the city.	I don't know when and where EV users charge the most.	I don't have real-time charging analytics and visualization	Unable to efficiently plan charging stations and manage electricity demand.
PS-2	An EV fleet manager	Monitor battery performance and driving range.	I can't easily identify batteries that are degrading or vehicles with poor efficiency.	I don't have a dashboard that compares battery health with actual driving range.	Concerned about unexpected breakdowns, higher maintenance costs, and fleet downtime.
